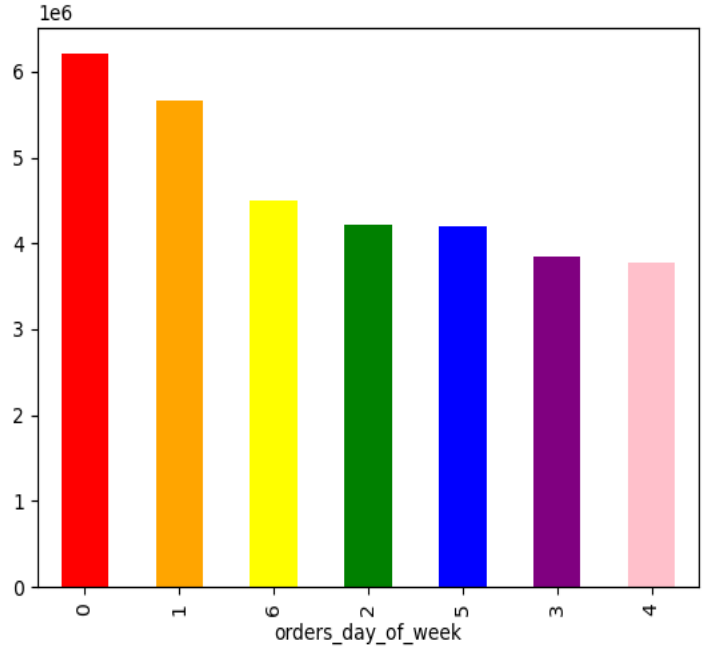
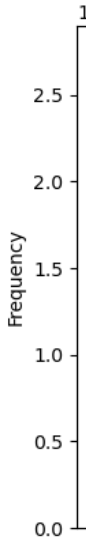
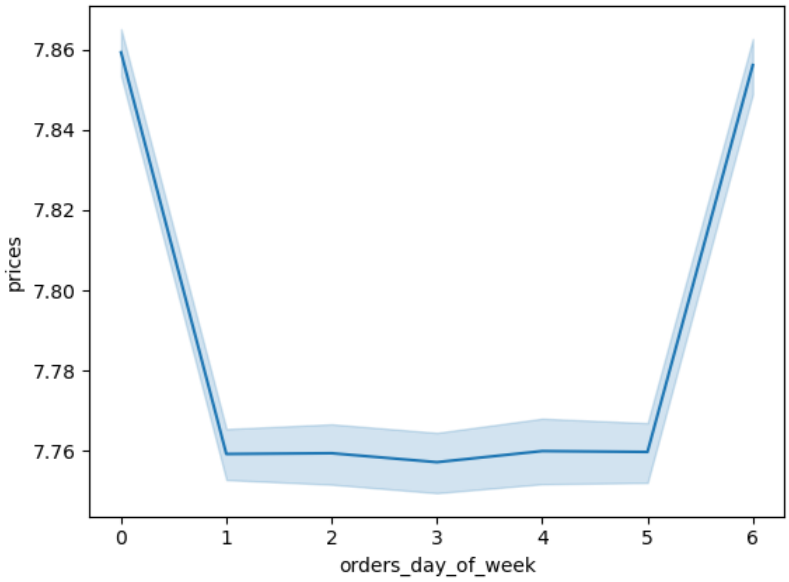
Visualizations

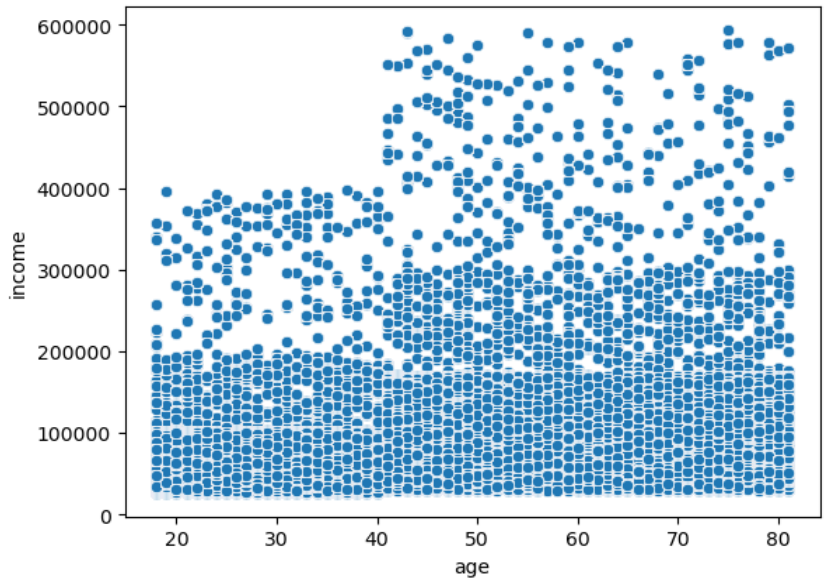




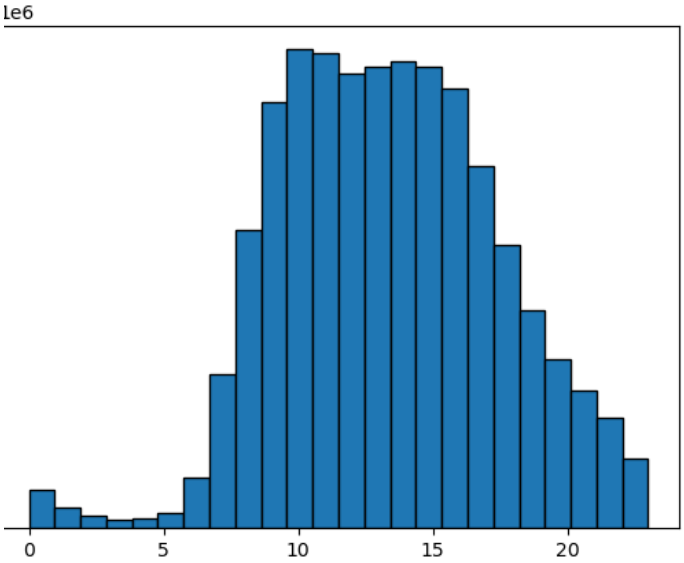
Most orders are placed on Sunday and Monday
Surprisingly, there are not so many orders on Fridays and Saturdays

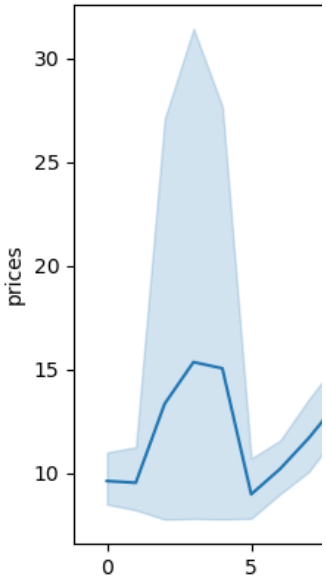


Sunday has the most orders and also highest in product pricing
Friday, though not many orders are placed, also in high in product pricing



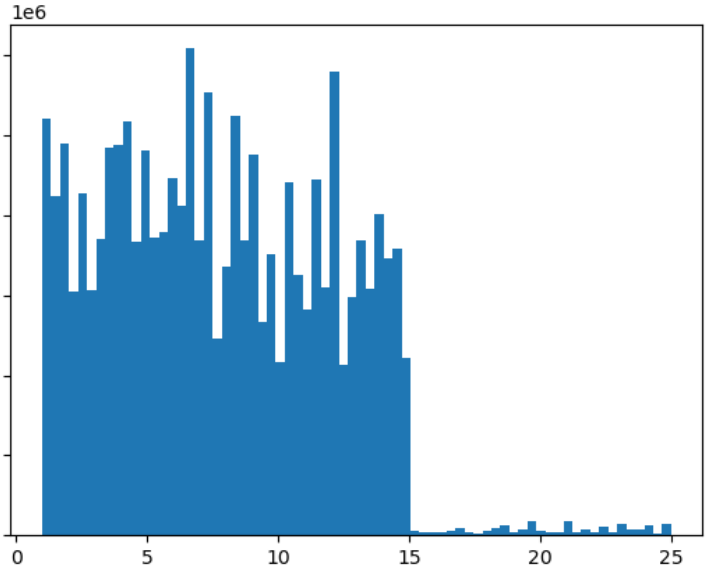
Income under 200,000 is consistent for all age groups
Those aged 40 - 80 are more so between 200K to 300K in income
Ages 18 - 39 don't have an income over 400K
A smaller population of those 40 to 80 make 400K to 600K

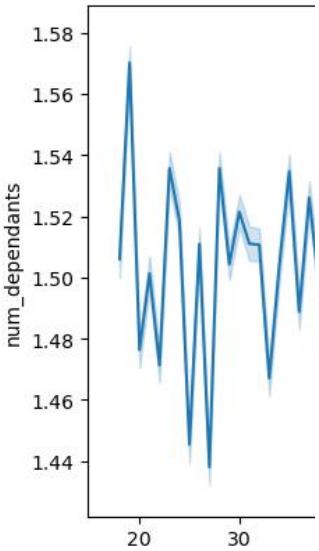




Late night, 12am - 5am orders are likely to be last minute or snack items
Peak hours are early morning to early afternoon.
Perhaps this is for breakfast and/or lunch time orders
Also could correlate to free time to be able to order

The amount of money
The could correlate to
Last minute/late night





Most products are between 1 and 15 dollars
A few are higher priced at 15 to 25 dollars
